

Shaft and machine-room lighting package

Upgrading the lighting in the elevator shaft and machine room improves occupational safety in your building. Our upgrade package provides sufficient lighting for technicians to carry out maintenance tasks and emergency lighting during power blackouts. It includes a light fitting within the elevator shaft for each floor served by the elevator, replacement lighting for the machine room, and a pit control comprising a power outlet, light switch, and elevator emergency stop button.

KEY BENEFITS

- Adequate lighting for safe maintenance work
- Improved occupational safety
- Emergency lighting for machine room during power blackouts to aid quick, safe rescue of entrapped passengers
- Improves risk management

TECHNICAL INFORMATION

- Installation time:
1 – 2 working days
- Components replaced:
existing machine-room and shaft light fittings
